

# Ancra Cargo Handl'r™

## CHAIN DRIVE SYSTEM

### The fast, efficient way to move product on pallets and slip sheets.

If you're handling product on pallets and slip sheets, the Ancra Cargo Handl'r can have a major impact on your company's productivity. When used in conjunction with Ancra Retract-A-Roll® II-PF 3" pneumatic roller track, for example, this system can load or unload a 53-foot trailer in under two minutes! By automating your trailers, you can reduce the number of units required to move the same amount of product.

#### Minimal maintenance.

Easy-access design makes system a breeze to clean and maintain.

#### Simple operation.

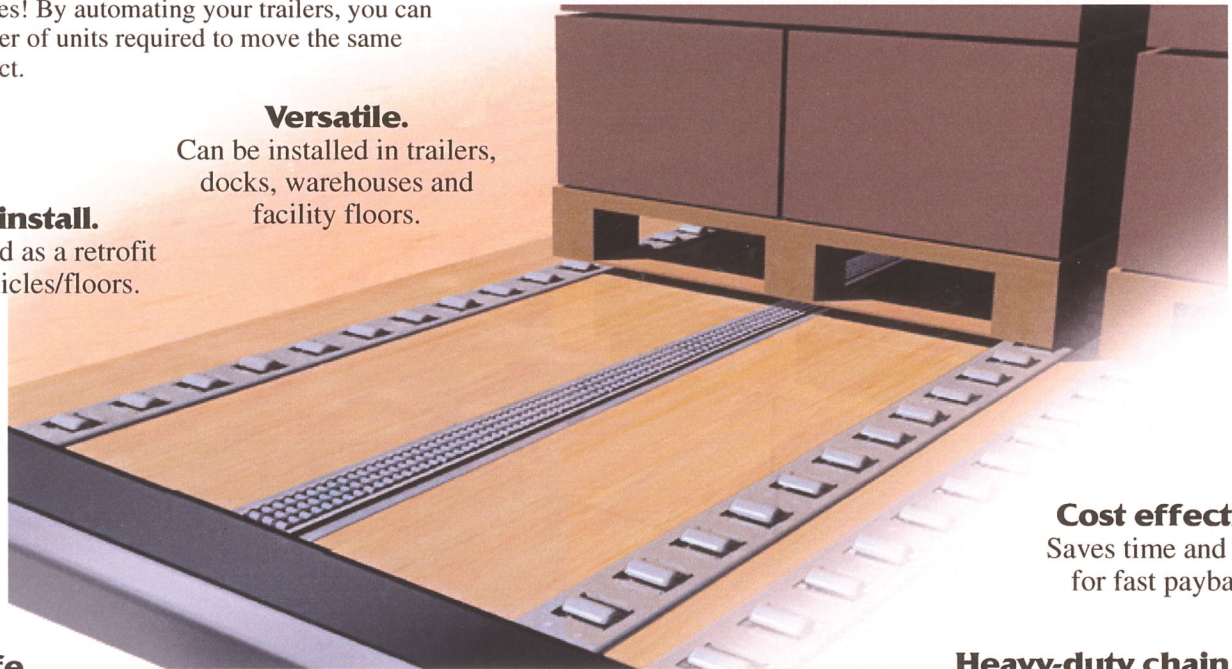

Choose from a wide variety of controls. Can be operated independently or synchronized with a dock system.

#### Versatile.

Can be installed in trailers, docks, warehouses and facility floors.

#### Easy to install.

Can be installed as a retrofit or in new vehicles/floors.

#### Safe.

Rollers and chain drives retract completely into floor, stabilizing pallets and making load safe for transit.

#### Made in the USA.

High-quality materials and craftsmanship offer outstanding reliability and durability.

#### Eliminates forklifts.

Permits more effective use of manpower while reducing the risk of cargo and trailer damage.

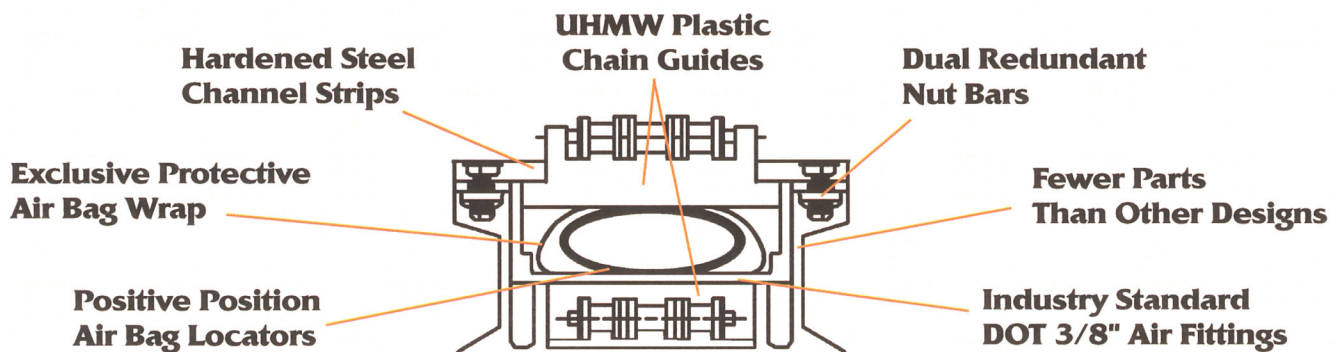

#### Cost effective.

Saves time and labor for fast payback.

#### Heavy-duty chain.

50-series, 5/8" triplex chain for increased strength and durability.

### Spec Ancra Cargo Handl'r™ Chain Drives - There Is a Difference!

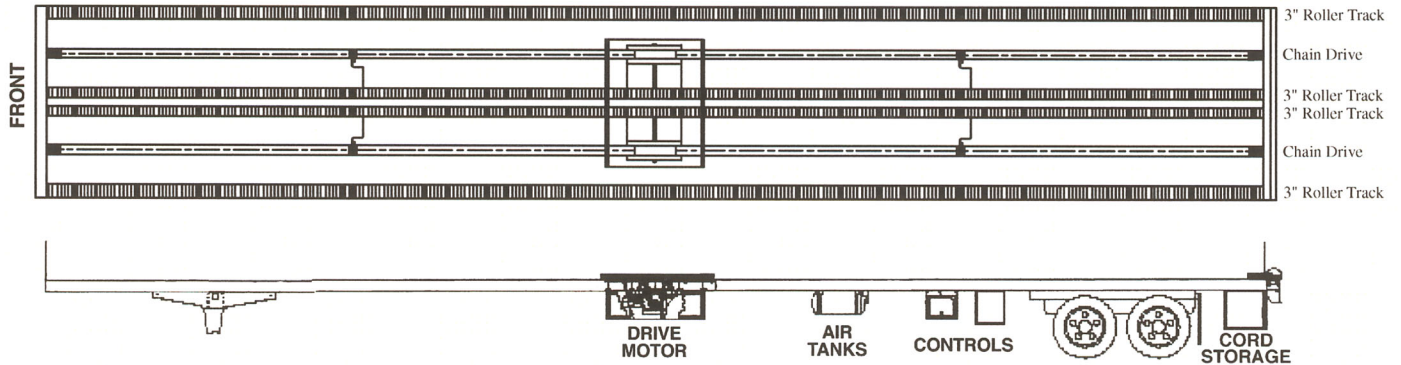

# Ancra Cargo Handl'r™

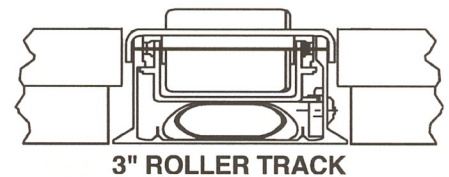

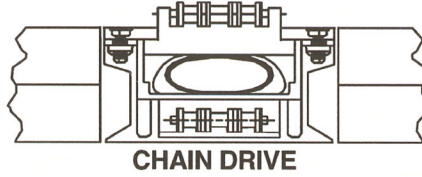

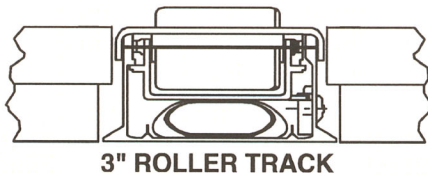

## CHAIN DRIVE SYSTEM

### Specifications - Typical 53-foot Trailer

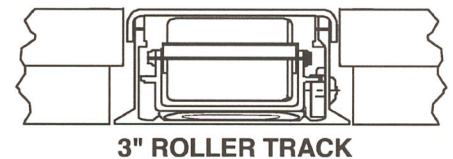

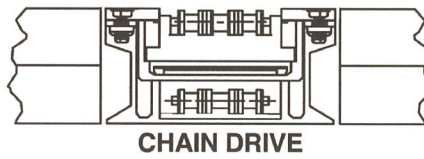

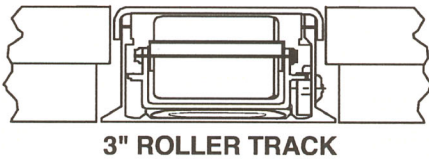

Height: 2.75 in.  
Air Pressure: 7-10 psi  
Capacity: up to 65,000 lbs.

### Raised

### Lowered

#### Fully integrated.

The Ancra Cargo Handl'r can be part of a custom-designed and fully integrated programmable dock and trailer load/unloading system. A wide range of rollers, conveyors and turntables can be combined to meet the needs of your particular application.

#### Typical configuration.

The Ancra Cargo Handl'r is usually installed between two rows of Ancra Retract-A-Roll® II-PF pneumatic roller track. The power unit is conveniently housed under the dock or trailer.
