

Securing Your Cargo Just Got Simpler.

*Introducing GlideLock,
by Ancra: the fastest and
easiest way to secure cargo.*

New, easy-to-use GlideLock brackets glide into place wherever you need them, allowing you to safely and legally secure your cargo using any standard flat-hook strap.

*Call 800-233-5138 or
visit www.ancra.com
for more information.*

*"With my new GlideLock brackets,
I know my cargo is safe,
my straps are secure,
and my truck is compliant."*

GLIDELOCK™
Sliding Load-Securement Bracket

Be Safe. Be Secure. Be Legal.

With The New GlideLock™ Load Securement Bracket From Ancra

Ancra International is proud to introduce the easiest and most economical way for fleets to comply with the recent changes in federal cargo securement laws... The GlideLock* load securement bracket.

GlideLock is not only the fastest and easiest method to secure

flatbed trailer loads, but it allows commercial vehicle operators to fully and economically meet recent Federal Motor Carrier Safety Administration (FMCSA) tie-down standards.

As its name implies, GlideLock simply glides onto the trailer rail or winch track of flatbed trailers. It can then be easily moved along any point of the trailer to capture, secure, and lock your cargo, using any standard flat-hook strap.

For more information on GlideLock and the full line of Ancra cargo-restraint products, call 800-233-5138, or visit www.ancra.com to download a brochure.

GlideLock load securement bracket — bring your fleet into compliance today.

GlideLock:

- Complies completely with the new FMCSA Rule
- Glides easily into place wherever you need securement points
- Brings your fleet into compliance economically
- Captures and secures your cargo using any standard flat-hook strap
- Insures correct pull-angle to the trailer bed and proper load securement
